

Sample Catalog Descriptions

Workshop example

Simple Machines

During this workshop, students learn to relate specific ideas of simple machines with movement. Ideas of wheels, gears, pulleys, levers, inclined planes, wedges, and screws are explored and structured into a movement class.

Performance example

Sum of Our Favorite Numbers

Making math fun is half the battle! Leslie and Jay Cady use juggling, humor, and a wacky fairytale to share many reasons why they like numbers. Kids will roll in the aisles as they delve into counting, addition, multiplication, division, and units of measurement. A hilarious game of 20 questions rounds out the show.
